

**2021 to 2024**

**Q10062103 - Does the 1884 models still support RAID-Controller based "Full Volume Encryption" like the 1882 series did or does it just support SED-Encryption ?**

No, ARC-1884 does not support full volume encryption because the processor does not support ROC encryption engine. The SED-Encryption feature is the only encryption function for the ARC-1884.

Unique solution ID: #1961
