

Q10021502 - When the ARC-1214's driver for FreeBSD would be available?

The arcmsr(4) driver on FreeBSD 8.4 and FreeBSD 9.2 (or later) has been updated to support ARC-12x4 series RAID controller. If you use driver older than these versions above, the driver will be not able to recognize the controller and arrays on the controller.

Unique solution ID: #1020
