

Q10081501 - How do we identify slow hard disk on Areca RAID Controller?

Firmware version 1.52 date: 2014-12-12 or later has supported a firmware-level hard disk / SSD speed test function "Hdd Xfer Speed" that is used to measure the drive's performance. "Hdd Xfer Speed" performs read tests without overwriting customer data.

Unique solution ID: #1008
