

Q10021308 - I got issue when I install Win 2012 using ARC-1213-4i, write through mode and 4x WD5003ABYX (3 for RAID 5 & 1 for hotspare). After completed the installation, the first time boot in the OS, the system shows DPC_WATCHDOG_VIOLATION error.

It is command length problem on ARC 1213-4i 4-port only, please update the firmware to date 2013-07-27 or later.

Unique solution ID: #1274
