

Q10071308 - Would it be possible for you to provide a custom ESXi 5.x install image with arcmsr included?

The vSphere 5 release was the inclusion of new PowerCLI functions called Image Builder. Image Builder allows VMware Admins to customize their installation media by adding and removing components. Customer can use it to make a custom ESXi 5.x install image with arcmsr included.

Unique solution ID: #1279
