

Q10031212 - I'm testing here with a NDS4600 box that contains 60 drives. When I connect it to an ARC-1882x, it only sees 32 drives.

ARC-1882 firmware is limited to 32 drives in one SAS enclosure. It has extended the HDD supported number from 32 to 64 from firmware version date: 2013-1-1 or later.

Unique solution ID: #1364
