

2018 to 2020

Q10041309 - I upgraded my server from vmware ESXi5.1U1 to ESXi5.5 and the Areca-driver didn't work properly after that.

Install scsi-arcmsr-1.20.00.15.vmk5.120930-1vmw.500.0.0.472560.x86_64.vib and it can work.
