Q10041311 - How many ARC-1882i can be installed in the same server board? When system installed five (5) ARC-1882i, ONLY four (4) can be recognized.

ARC-1882i device driver can support more than 4 adapters. But BIOS only scans 4 adapters. System will only see 4 BIOS screen on the bootup. It is resource limitation.

Unique solution ID: #1295
