

2018 to 2020

Q10051503 - ARC-1214 tested with slots 8, and 10 on the Supermicro X10DRG-Q booting Win7 Pro x64 normally, but would show a WHEA PCI root port error in the event log.

There has one "WHEA Support" on the M/B BIOS "ACPI Settings". The options are Enabled and Disabled (default). Select Enabled to support the Windows Hardware Error Architecture (WHEA) platform and provide a common infrastructure for the system to handle hardware errors within the Windows OS environment to reduce system crashes and to enhance system recovery and health monitoring.

Unique solution ID: #1032
