

2018 to 2020

**Q10041211 - We have seen logins ("HTTP Log In")
from many IP in the event log. Is there a known
problem with a backdoor/security issue?**

No known backdoor or security issue found. If your web manager has real IP, please modify the port from 80 to others such as 3000 or higher. Use real IP with default port 80 is very easily been attacked.

Unique solution ID: #1360
