

2018 to 2020

Q10061101- I've been trying to install the ArchHTTP software in Windows 2k8 R2 but continue you receive a Java error during the installation. The error is "javaw.exe has stopped working".

It is a compatible issue between the new nvidia graphic card driver and the java buildin the archhttp installer. two possible solution available

1. Uninstall the nvidia driver, install archhttp and then reinstall the nvidia driver again.
2. Install new version archhttp date: 2011-01-04 . It can be found in our ftp site, the beta folder.

ftp://ftp.areca.com.tw/RaidCards/AP_Drivers/Windows/HTTP/Beta/Build110104/

Unique solution ID: #1380
