

**2018 to 2020**

**Q10011107 - When the upgrade FreeBSD 8.2 Stable kernel tries to boot, it panics with MTX duplicated use at arcmsr.c:2093. This is with the most recent driver imported in 8.4 on 06/06/2011. A kernel of 26-feb-2011 has a previous version 1.20.00.19 does not have this problem.**

It has solved by the driver version 1.20.00.22 and later.

Unique solution ID: #1411
