

2015 to 2017

**Q10051103 - We have problems with the new Linux driver (arcmsr.1.20.0X.15-100729) for the raid controller ARC-1880. Our system is Linux debian 5.07 (lenny) amd64. Build the driver againsts the XEN kernel (2.6.26-2-xen-amd64) we got following errors on boot time:
arcmsr0: dma_alloc_coherent got error arcmr0:
arcmsr_alloc_ccb_pool got error**

The standard driver code does not work with the xen kernel which will result dma alloc error. Please get the Xen source from support@areca.co.tw.

Unique solution ID: #1386
