2018 to 2020

Q10042009 - unRAID is unable to read the SMART information from any of the hard drives or temperature information from ARC-1883IX-12 configured in Pass-Through mode.

ARC-1883ix is a pure hardware raid controller. All these devices configured in Pass-Through mode you saw in OS are logic devices. You have to use smartmontool if you would like to monitoring smart of these connected drives.
