

**2015 to 2017**

**Q10011503 - Would like to know the correct way to configure the ARC-1883 email notifications.**

Areca raid adapters can generate emails by two methods

1. The firmware build-in feature through controller onboard Ethernet port:

You can configure this feature in controller web manager, mail notification setting page.

2. The management tool archhttp through the Ethernet port on motherboard:

You can configure this feature in archhttp management page.

Unique solution ID: #1028
