

Q10061111- I have installed Solaris 10 05/08 on a raid 5 system installed fine and disks recognized running smoothly. However, in my system log files get the messages: Nov 24 14:15:28 soip10 arcmsr: [ID 809499 kern.notice] CCB state every 90 seconds.

These messages are driver version: V1.20.00.20 2011/4/20 debugging purpose. It will be removed from next driver version.

Unique solution ID: #1432
