Q10090906 - It is impossible to update bios, firmware, boot for ARC-1200. Did all file flash under the following instruction?
nflash arc1200firm.bin/c0 (as tried 1, 2, 3)
Always writes: ARC1200FIRM.BIN
File Not ExitsQ-

Since the DOS works with filename with up to 8 characters, you may need to change the existing file name. Using the DOS nflash utility to update firmware, the default fine name on our CD or Ftp should be modified under DOS environment.
