# Q80041708 - When I connect the ARC-8050T3-12 to my iMac I get a kernel panic that says thunderbolt family. Previously this machine had a ARC-8050T2 attached which worked fine.

The macOS supports TB3 devices since macOS Sierra (version 10.12). Your iMac OS must be 10.12 or later to be able to use TB3 devices.

Unique solution ID: #1711
