

2012 to 2013

Q10071307 - We have a server using ARC-1222 with Windows 2012 installed with Areca driver version 6.20.00.26 which was running without problems. It has something wrong with 6.20.00.27 for Windows 2012.

This is a problem between the driver 6.20.00.27, Windows 2012 and older cards. It has fixed by the new version driver 6.20.00.28 or later version.

Unique solution ID: #1269
