

2016 to 2020

Q50021707 - Can we connect Active Optical Cable between LSI SAS9300-8e and ARC-8018 expander?

ARC-8018 can work with the 8644 AOC cable that has been programmed correct parameter.

For AOC support, please check two items:

1. HBA must use AOC support firmware
2. Expander must turn on AOC support by command: cable on

Unique solution ID: #1707
