2016 to 2020

Q50011808 - Expander reported as Enclosure status "Unhealthy" under Windows Failover Cluster.

Windows server tools sometimes will get abnormal status at initial stage. Please download expander firmware revision: 03.01.37.69 07/18/18 to fix the "Unhealthy" issue.

```
ClassName                          : MSFT_StorageEnclosure
BusType                            : SAS
HealthStatus                       : Unhealthy
OperationalStatus                  : Error
PowerSupplyOperationalStatus       : {OK, OK}
FanOperationalStatus               : {OK, OK, OK, OK}
TemperatureSensorOperationalStatus : {OK, OK, OK, OK...}
VoltageSensorOperationalStatus     : {OK, OK, OK, OK}
CurrentSensorOperationalStatus     :
IOControllerOperationalStatus      :
```
