

2016 to 2020

Q80021805 - My OSX Disk utility can see the ARC-8050T3-8 volume capacity. When I try to erase (format MAC OS Extended) the process fails: "couldn't open device"

If your volume status enables the write protection feature, you will be not able to write anything into the volume. Please disable the write protection feature.

Unique solution ID: #1852
