

2016 to 2020

Q80021903 - I want to completely uninstall the MRAID Software (latest) from a Mac Computer, but I can't find an uninstaller script to do that.

In order to uninstall MRAID software completely, you can manually delete the following two items.

1. the folder /Applications/MRAID
2. the file /Library/LaunchDaemons/archhttp64.plist

Unique solution ID: #1868
