2010 to 2015

Q30011501 - ARC-1320-8X can not work with Infortrend SAS storages - ESDS S12S-G2240 using driver version 6.0.0.10.

This issue has been fixed on driver version 6.0.0.11 or later. But ESDS-S12S-G2240-4 has issues with ARC-1320-8X. Windows crashes during boot if ESDS-S12S-G2240-4 is connected.
