

2010 to 2015

Q50011106 - Can we mix 6G ARC-8026 and 3G ARC-8020 on one daisy chain?

SAS spec has one suggestion that you may need to disable the ARC-8026 self-discovery function on putting it after 3G ARC-8020. How to disable self-configuration function?

CLI> SCE off

We released SAS expander F/W to support SCE function since Nov 2011. Please make sure you have updated to new F/W.
