

2011 to 2015

Q80011406 - Is there any information about the level of DB (decibel) of ARC-8050T2?

Follow the ISO 7779-999 test, the sound power level of ARC-8050T2 is 43DB. We have reduced the level from firmware version 1.52 date: 2014-6-12 or later.

Unique solution ID: #1565
