

2009 to 2011

Q10041107 - The Seagate Constellation drive is a 6Gb SAS drive. Will this drive work with the ARC-1680-ix-12 on HP DL385 G5? I'm getting a "No IDE Drive" at the BIOS level?

HP has done something proprietary with the backplane. It can not accept the standard cross-over or straight-thru cables.

Unique solution ID: #1414
