

**2009 to 2011**

**Q10040902- Since 1-1-2009 the time setting on the ARC-1222 is confused and not correct. Used all kind of NTP servers, but at the NTP settings it stated that the date is somewhere in 1990. At the event section it says it's 2022.**

Areca RAID adapter or external RAID controller's firmware has a known NTP timestamp bug after 2009. It has been fixed in the V1.46 date:2009-1-6 or later.
