

2016 to 2020

Q10021605 - Is there a way to tell RAID controller hardware revision in software?

From firmware version 1.53-20160513, it support the capability to read the hardware revision if the RAID controller has implemented it. The hardware revision will show at the Hardware Monitor page or Raidset Hierarchy page:Enclosure#1:RAID Adapter V xx. Controller reads "Enclosure#1: RAID Adapter V1.0" if it does not support this feature.

Unique solution ID: #1604
