

**2009 to 2011**

**Q10081012 - The system is q9400 core2quad with  
ARC-1200 raid1 2xHDD. Getting the following  
error in dmesg of system  
Sep 19 01:50:44 dedi kernel:  
(probe16:arcmsr0:0:16:0): inquiry data  
fails comparison at DV1 step.**

It is a known kernel bug on DMA resource remapping/swapping, similar error happen on other virtual devices in other cards too. You can try to use a newer kernel environment to see if this bug had been fixed.

Unique solution ID: #1470
