

**2016**

**Q10031605 - The ARC-1883ix appears to scroll  
though the disks in the Quanta M4600H JBOD  
until it hits the disk drive in slot 49.**

It is a bug expander firmware on RAID controller and ARC8018/28 that failed to build 60-bays expander table. Update the firmware to revision date: 2016-05-25 or later to fix this issue.

Unique solution ID: #1606
