

**2017**

**Q10101404 - RAID adapter firmware 1.52 build  
RAID volume is 0.1 GB smaller than 1.51fw.**

Our 1.51 firmware supports stripe size up to 128KB. But 1.52 firmware supports stripe size up to 1024KB. This is a truncation base from the firmware that it uses 128KB for version 1.51 and 1024KB for version 1.52.

Unique solution ID: #1116
