# 2015 to 2017

# Q10021301 - ARC-1222 controllers has "Blue Screen" error right after finishing the installation of the OS which is Win Server 2003 R2 Std 32Bit. We tested the 64 Bit Version of this OS and its working fine.

The latest driver needs to have sp2 to avoid possible bsod caused by the storport.sys issue. You need to use the older driver version if you do not want to update the windows system to sp2.
