2011

Q10051103 - We have problems with the new Linux driver (arcmsr.1.20.0X.15-100729) for the raid controller ARC-1880. Our system is Linux debian 5.07 (lenny) amd64. Build the driver agains the XEN kernel (2.6.26-2-xen-amd64) we got following errors on boot time: arcmsr0: dma_alloc_coherent got error arcmsr0: arcmsr_alloc_ccb_pool got error

you may get this error message when system have no enough memory space for driver requested please configure driver host queue to 64 or less to see if it helps.

you can configure driver host queue parameter by typing the driver parameter as kernel option during system booting.

arcmsr.host_can_queue=64
