

2012 to 2013

Q10031005 - I am working on a Debian x64 configuration, and I would like to launch automatically the Archttp64 daemon automatically with the OS, without any windows appear under the desktop. I have unpacked into /bin and Chmod +x the Archttp64 file, when I launch it in a terminal windows it works fine. The goal is now to install as service.

Copy "archtt64" into /bin/

Chmod 777 /bin/archttp64

And in a terminal windows : echo "archttp64" >> /etc/init.d/rc.local

This last command write in /etc/init.d/rc.local a new line archttp64.
