

2009 to 2010

Q10181012 - I'm trying to expand my RaidSet from 8x Hitachi 2TB RAID-5 to 9x Hitachi 2TB RAID-5. I received the "Expand RaidSet" event but not the following "Start Migrating". Volume state is "Need Migrate".

To protect the data in array, background tasks start only in two conditions

1. Stay in bios manager console or
2. The controller driver is loaded

Controller will not start migrate array if the system do not stay in these two conditions above.

Unique solution ID: #1480
