

2018

Q30011707 - ARC-1300-4e does not appear to be working with on my Mac OS X 10.11 system.

ARC-1300 does not support OSX 10.11 or later versions. Mac OS X no longer supports IO Mapping since 10.11, but IO Mapping is necessary for ARC1300 series adapter.

Unique solution ID: #1702
