Q40031903 - How to disable Windows 10's 'USB selective suspend' setting?

When a USB device is not working correctly with your Windows 10 PC, you can try disabling the "USB selective suspend" feature to fix the problem. Here's how.

- 1. Open Control Panel.
- 2. Click on Hardware and Sound.
- 3. Click on Power Options.
- 4. Under "Preferred plan," click the **Change plan settings** link for the plan you're currently using..)
- 5. Click the Change advanced power settings link.
- 6. Expand **USB settings**.
- 7. Expand USB selective suspend setting.
- 8. Select **Disabled** from the drop-down menu.
- 9. Click Apply.
- 10. Click **OK**.
