

2014

Q80051403 - Installing Windows Server 2012R2 on a Mac Mini with bootcamp drivers 5.1.56.21 connecting to an ARC-8050. Randomly, the RAID-6 array is apparently removed while the system is still running (Event ID 29 from source arcs_a64 : "Areca RAID Volume removal")

Update Intel Chipset Inf drivers to version 10.0.13 instead of version 9.4.0.1026 provided by Apple.

Unique solution ID: #1230
