

2017

Q10021710 - OS is unable to load from an Intel S2600WT 2600WT main board with an ARC-1882IX-12 and an ARC-1203-2I.

There has a known compatible issue between Intel bios and two Areca RAID adapters under legacy INT13 mode. Please login controller manager console: the BIOS selection feature, and choose UEFI to force these cards works with UEFI mode.

Unique solution ID: #1715
