

2024

Q90012408 - ARC-1886-16i in a PCIe G4 slot with 8x Seagate ST14000NM0081 Mach2 SAS HDD attached in a RAID5 configuration uses the AJA benchmark tool for measurements. The file size to 64GB only gets write speed at 3.6GB/s and read at very low 1GB/s.

After changing the “Read and Discard parity Data” setting to “Enabled”, the benchmark got the following result under Windows Server 2019 with 8x Mach.2 drive:
