Q10041503 - When we use an Intel mainboard S2400SC with Xeon V1 processor the ARC-1882 card is communicating a PCIe 2 speed on a PCIe 3 slot.

The S2400SC BIOS option “Processor PCIe Link Speed” will not be visible if the platform employs the Intel V1 families CPU, and the BIOS will limit the PCIe slots speed to PCIe* 2.0 speeds unless the Intel add-in adapters.
