

2017

**Q10041608 - Supermicro X9DRD-7LN4F BIOS v3.2
will stuck at POST, when both ARC-1883i and
ARC-1883X firmware updated to 1.53 2016-05-13.
If only one alone, system passes POST and boots.**

It is a known issue of the new bios code in new firmware package; please
downgrade these two cards with the bios code in 1.52 firmware package.

Unique solution ID: #1624
